

# Consumption Reporting

This guide explains the cLMIS Consumption Reports.

In this guide, you will learn about:

1. Consumption Report
2. Reporting Monthly Data

## About Consumption Reports

Monthly stock consumption is an important indicator that is calculated manually during the month. The District store operator enters data for the assigned Health Facilities to LMIS monthly consumption report.

Data can be entered for each month on or after the 1st date of the next month. Data entry operators can edit data for the last entered month for that store / facility.

To add the monthly stock consumption report:

1. Sign in to the District User account.  
User Home page displays.
2. From the left menu, click **Monthly Stock Consumption**.  
The Monthly Consumption page displays.
3. The district store's consumption report is displayed under **District/Field Stores** table. The list of health facilities is displayed under **Health Facilities** table.

Consumption Data Entry

Please enter Field/SDP Report (Pre requisite) and then District store report.

The user can specify the following for each product:

- **Opening Balance:** this balance is generated automatically based on previous months stock and consumption.
- **Received:** the user can enter the received amount for each product in this entry-box.
- **Issued:** the user can enter the issued amount for each product in this entry-box.
- **Adjustments (+), (-):** the user can enter the adjusted quantity for each product. If an additional quantity is added to stock that has not been issued (e.g., recovery), it should be added in the (+) adjustment entry-box. If some of the stock has become unusable due to theft, loss, expiry, etc., it should be added in the (-) adjustment entry-box.
- **Closing Balance:** the closing balance is calculated automatically.

- **Cases/Clients:** the user can enter the number of cases or clients entertained during the month in the health facility. The new cases are entered in the **New** entry box, whereas the old cases are entered in the **Old** entry box.

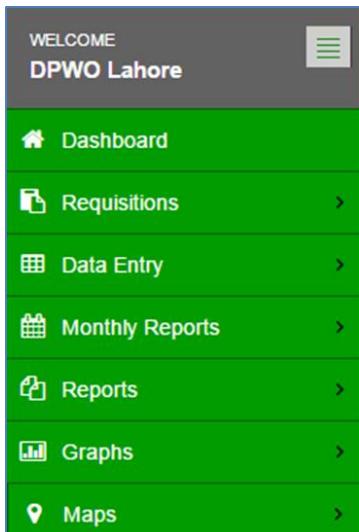

5. In **Surgery Cases (Referred)**, specify the **Male** and **Female** cases.
6. In the **Mother and Child Care (No. of Cases)**, the following options can be specified:
  - **Ante-natal:** specify the **New** and **Old** ante-natal cases.
  - **Post-natal:** specify the **New** and **Old** post-natal cases.
  - **General Ailment:** specify the **New** and **Old** general ailment cases.
7. Click **Save** to save the consumption report.
8. The user can edit the last 2-months consumption report. Click the report to modify the data and then click **Save**.
